this book is written from the perspective of a social psychologist as a consequence the topics covered in the upcoming chapters were chosen from among those traditionally of interest to the discipline of social psychology a criterion for inclusion was the topic's usefulness in providing insights and or understanding of the social processes at work in sports settings to this end i have drawn extensively from mainstream journals in social psychology e g journal of personality and social psychology and grounded the discussion of topics and issues on the methodologically sound studies experiments they generally provide there is also an equally strong interdisciplinary emphasis that features research from physical education sociology management science and education i have made a further attempt not as successful as i would have liked to incorporate a substantial amount of the fine sports research that has been conducted overseas particularly in europe and australia i am hopeful that in bringing together the works of international scholars from a variety of disciplines a clearer and balanced outline of this field will take shape and now a word about the audience for this text and how to get the most from its pages i would suggest that the reader have taken a course in social psychology following an introductory level course an introductory course in research methodology would also be helpful
